

Three in One!
InVade
multi rtu

Foaming, Mopping, Drains

Directions for Use

InVade Multi RTU contains premium, scum-eating, odor eliminating microbes, citrus oil, cleaners and foaming agent.

Foaming: Place in the Foamer Simpson or similar hand foamer or power foamer. The product may be blended with an IGR and/or pyrethroid or non-repellent insecticide (and the pesticide label must then be followed). Do not blend with other chemicals.

Mopping: Apply 4 oz to a standard bucket (about 3 gallons) of warm (not scalding hot) mop water. No other cleaners are needed. After mopping, pour remaining mop water in drains. For best results, use at least three times a week. Do not rinse treated areas or use bleach, caustic cleaners or disinfectants in mop or spray water.

Drains: Moisten drain with warm water (1-2 gal) if not used regularly, and apply at low drain usage times of the day. Apply 4 oz to each drain around the edges to coat the sides of the drain. Repeat daily for 5-7 days and then every 1-2 weeks for ongoing maintenance.

Contact us for recommendations for other applications.

Precautions: Keep out of reach of children. If swallowed, seek medical attention immediately. Give one glass of water and do not induce vomiting. Wash hands well after use. If in eyes, remove contacts and flush with water for 15 minutes. Seek medical attention for any persistent irritation. Store in a closed, appropriately labeled container; out of reach of children, between 35 and 95 °F.
